

Specification
Bath Buddy

App# 10054, 202

This item will be used to hold bar type soaps of varied sizes and shapes. The terry cloth material will allow the soap to suds through the material and allow a person to bathe without the need of having to hold wash rag and bar soap in both hands; this allows a person more freedom of movement while bathing. The bath buddy also has a rope or terry cloth handle which a person could/can use to hang up the bath buddy; this allows the bath buddy to drip dry and prevents premature deterioration of the bar soap from water saturation.
